IAD/OSS - 66/66  
24 February 1966

MEMORANDUM FOR: Assistant for Plans & Development, NPIC

ATTENTION :

FROM : Chief, Imagery Analysis Division, CIA

SUBJECT : Rapid Access Contact Printer

REFERENCES : (a) IAD Memorandum, OSS-13/66, dated 13 January 1966,  
Subject: Request for Development Action--Rapid  
Access Contact Printer  
(b) Memorandum NPIC/P&DS/D/6-739, dated 24 Jan. 1966,  
Subject: Rapid Access Contact Printer  
(c) Draft copy--Specification for Rapid Access Contact  
Printer

1. On 16 February [ ] P&DS, discussed the above  
referenced draft of specifications for a Rapid Access Contact Printer  
with [ ] OSS/IAD. These specifications appear to be complete  
and incorporate all the desired characteristics as expressed in reference  
(a) above. It was noted that the specifications call for a 350 line per  
millimeter resolution as opposed to our expressed desire for a minimum  
resolution of 400 lines per millimeter; this change was discussed with  
[ ] and it was agreed that 350 lines per millimeter would be  
satisfactory for IAD's needs at this time.

2. As a point to be considered as this development moves through  
its cycle, attention should be given to the establishment of positive  
logistics procedures for the procurement of all expendable materials  
required for operational use of this equipment.

3. The Imagery Analysis Division continues to have a pressing need  
for this item and is appreciative of the rapid handling our development  
request has received from the Plans & Development Staff. We are most  
interested in seeing the formal proposal for this piece of equipment,  
along with price quotes for the prototype, the operational production  
models, and expendable materials.
